

**RESULT
NINJA**

Your skincare brand is watching **ready-to-buy customers walk away** without a single email sent.

This is what bringing them back looks like.

A 3-email abandoned cart recovery flow — built live,
from scratch, for a UK DTC skincare brand.

ABOUT THIS DOCUMENT

The average DTC brand recovers less than 5% of abandoned carts.

A properly built recovery flow can recover 15–20% of those lost orders.

Every email not sent to an abandoner is revenue quietly leaving your account.

This document shows exactly what a properly structured abandoned cart recovery flow looks like when built correctly inside Klaviyo — with the right trigger, the right timing, and the right copy at every stage.

The flow is built around one strategic principle: earn the purchase, do not demand it. Email 1 is a warm, low-pressure reminder. Email 2 handles every common objection — price, ingredients, and trust — in one email. Email 3 delivers the final urgency offer and then steps back completely.

Every element — triggers, wait steps, conditional purchase-exit logic, and the dynamic product block in Email 3 — was built and configured inside a live Klaviyo account. Nothing here is a mockup.

WHAT IS INSIDE — ABANDONED CART RECOVERY

Email	Timing	Theme	Offer
Email 1	2 hrs	Gentle reminder — warm, no pressure	None
Email 2	24 hrs	Objection handler — price, ingredients, trust	None
Email 3	72 hrs	Final urgency offer — last chance	15% discount code

KEY FEATURES OF THIS FLOW

- Checkout Started trigger — industry standard for cart abandonment flows
- Purchase-exit conditional split after Email 1 and Email 2 — no unnecessary sends
- No discount offered in Email 1 or Email 2 — trust is built before the offer lands
- Dynamic product block in Email 3 — auto-displays the exact abandoned product per customer
- One CTA per email — single focus, maximum conversion impact
- Mobile-optimised design — built for thumb-tap, not just mouse-click

Klaviyo Practitioner

BEFORE YOU READ THE EMAILS

What I Do

I am a Klaviyo email strategist and conversion copywriter. Both. In one person.

Every email you are about to read was written, structured, and sequenced by me. I am the one who built the flow logic, set the timing, and configured the conditional splits according to the client's requirement. That matters more than it sounds. Most brands hire a Klaviyo specialist and a copywriter separately. The specialist builds a flow the copywriter has never seen. The copywriter writes emails the specialist drops in without reading. But since I am a Klaviyo Strategist, Practitioner, and a copywriter myself, I know how to piece together all the pieces of the puzzle completely.

If you already have a copywriter you trust, that is completely fine. I can work alongside them. If you want my input and review on copy before it goes into Klaviyo, I am ready for that too — flagging what will and will not land with a skincare audience, and making sure that the words and the flow logic are telling the same brand story.

Why You Are Seeing a Protected Brand — and Not a Named One

ResultNinja operates the way ninjas do — quietly, and behind the scenes.

I sign NDAs with every client I work with. This keeps their business secrets, their brand name, their Klaviyo data, their revenue numbers, their email performance, and their flow architecture protected. None of it is shared publicly — not even on my website or LinkedIn — nor shown to anyone without explicit written permission from them. Not now. Not ever.

The emails you are about to read are real. The copy is real. The flow logic is real. The results behind them are real. The client exists.

What has been changed is everything that could identify them — the brand name, the founder name, the product names, and any data points that could be traced back. This is not a portfolio sample built in the air. This is a real client engagement, protected by a mutually signed NDA, presented to you with all identifying information removed.

This is how I work with every client. Including you, if we work together.

No client of mine will ever find their Klaviyo revenue, their flow performance, or their email strategy displayed to their competitors so that I can win my next project.

That is not how ResultNinja operates. ■

What I Do Not Do

I do not design.

The templates you are about to see were built inside Klaviyo's native editor — they exist to show the emails in context, not to showcase my design work. In a real engagement I work with your existing brand templates and visual identity. If you ever need designs built from scratch, we can talk about that on a call.

What You Are Evaluating

The copy, the sequencing, the flow architecture, and the psychology behind each email and why it arrives when it does. The purchase-exit logic that ensures no customer receives an email after they have already bought. Those are the deliverables and that is what this document is built to show you.

Also note — this sequence was made fully adhering to the client's needs and their current brand journey. Treat this as a dynamic thing and not static.

Every bracketed value — [X]%, [DATE], [Product Name] — has been replaced with neutral placeholder data to protect the client's identity. In a live account these carry real brand values.

ResultNinja operates on one principle — your results speak. Your data never does.

PETAL BARRIER

GENTLE BY DESIGN.
STRONG BY NATURE.

Hi  First name OR "there" ,

Life gets busy. We completely understand. But we have noticed that you left something in your cart a little while ago. We did not want it to disappear before you have had another chance to come back for it. Your Petal Barrier order is still saved.

In case if you were still considering, here is a quick reminder of what makes these formulations different from everything else you will find on the market:

-  Fragrance-free with essential oils that are build for skin-types that cannot afford irritants.
-  Real Clinically studied actives at effective concentrations and not some label decorations.
-  Formulated specifically for sensitive, reactive, and compromised skin — not adapted from a generic base

No proprietary blends. No guesswork. Just clean, considered skincare that does exactly what it says.

Your cart is saved and ready whenever you are.

And if something gave you pause at checkout — the price, a question about an ingredient, anything at all just hit [Reply](#). A real person will get back to you within a few hours.

We would rather answer a question than lose you.

To your healthiest skin,
Sophie Rawlings
Founder, Petal Barrier

PETAL BARRIER

GENTLE BY DESIGN.
STRONG BY NATURE.

Hi ,

You were close. And then something stopped you.

Maybe it was the price. Maybe you were unsure whether the ingredients are as clean as we claim. Maybe you have been let down by other skincare brands before and you are not ready to trust another one yet.

Whatever it was — we hear you. And we would rather answer it honestly than push you into a decision you are not ready for.

So here is the truth:

ON PRICE

Petal Barrier costs more than high-street alternatives — and there is a reason for that.

Botanically-sourced actives at clinically effective concentrations, independent third-party lab testing on every single batch, fragrance-free formulation that does not cut corners on the base — these things cost more to do properly. We absorb that cost so that you do not absorb the compromise.

ON INGREDIENTS

We do not ask you to take our word for it.

Every batch of every Petal Barrier product is independently tested by a certified third-party laboratory before it reaches you. The results are real and available — just reply to this email and ask. We will send them directly.

ON TRUST

We are not asking you to take a leap of faith. We are asking you to listen to the women who already did:

★★★★★

"I almost did not order. The price held me back. Now I tell every friend with sensitive skin — this is the one brand I will never switch from."

— Verified Buyer

★★★★★

"I checked the ingredient list three times before I bought. Everything matched what they said. First skincare brand I have ever fully trusted."

— Verified Buyer

★★★★★

"I was sceptical about the fragrance-free claim — a lot of brands say it and do not mean it. Petal Barrier means it. My skin has not reacted once in four months."

— Verified Buyer

" THE REPAIR SERUM by Petal Barrier "

- Ceramide-rich barrier repair.
- Clinically studied actives at effective concentrations
- Suitable for sensitive skin.

Totally WORTH it

If you Still have a specific question? Hit **Reply**. A real person reads every email and will respond within a few hours.

We would rather earn you slowly than lose you quietly.
